

Demystifying Dopplers & Diabetic Foot Screening Refresher

Using national guidelines as a framework, this workshop reinforces your existing knowledge alongside maintaining and enhancing skills. It will help you to stay up to date in your role and be familiar with any recent developments.

It includes:

- A 'diabetic foot screening' overview & case study discussions
- New developments associated with diabetic footcare
- Using dopplers – who, what, why, when & how
- Practical demonstrations by the educator
- 'Hands on feet' practical session for all attendees –
putting the theory into practice

To expand understanding, we finish with an Ankle Brachial Pressure Index (ABPI) Assessment demonstration; highlighting what a fuller vascular assessment can entail.

Demystifying Dopplers & Diabetic Foot Screening Refresher

For up to 14 people, we can deliver this training 'in house' at your place of work, exclusively for your organisation.

Occasionally we arrange face-to-face open workshops, where individual places can be booked. Alternatively, if you would like to offer your facilities as a venue for an open workshop, or work with us to arrange an open workshop in your geographical area, please contact us.

Each learner is provided with a comprehensive printed delegate pack and certificates are distributed electronically after the workshop has taken place. Complimentary refreshments are available at open workshops.
