# Diabetic Foot Screening Workshop, 13 March 2027

Are you a **Foot Health Practitioner, Chiropodist**, **Podiatrist**, or someone who works in a **health or social care role** supporting or treating people living with diabetes?

Diabetic foot checks are part of the regular 'key care processes' everyone living with diabetes should receive.

Help people living with diabetes to avoid potential foot related problems by educating them and by ensuring that you are following current guidelines and best practice… learn or improve/refresh your skills and maintain your confidence!
Share the screening outcomes with the GP practice/the multi-disciplinary footcare team.

Using NICE guidelines as a framework, this workshop aims to equip you with the knowledge and skills to competently examine and screen the diabetic foot for potential and actual problems. It's not just the theory! In an interactive and safe learning environment, you will be putting your new knowledge into practice.
